

**Basic Math and Measuring
Unit 5**

Assignment Sheet 9—Measure Distances with 1", 1/2", and 1/4" Graduations

Name _____ Overall Rating _____

Evaluation criteria	Rating
Accuracy with 1" graduations	_____
Accuracy with 1/2" graduations	_____
Accuracy with 1/4" graduations	_____

Directions: Study the rules in the illustrations and answer the questions about the graduations on each set of rules.

1. a. Point A, on line segment AB below, is at the end of the rule. Point B is nearest what number? _____

- b. Is AB exactly 4 inches long? _____
- c. Is AB exactly 3 inches long? _____
- d. AB above is approximately _____ inches in length.
- e. Would a measurement less than a full inch be exact on this rule? _____

Assignment Sheet 9

4.

- a. Is 3 inches an accurate measure for AB above? _____
- b. Could we get a more accurate measure of AB if we divided the inches into smaller units? _____

5. a. Into how many parts has each inch been divided on the rule below?

- b. Is B located nearer 2, $2\frac{1}{2}$, or 3 inches? _____
- Note: Remember, always read to the nearest mark on a rule.

6. Write in the missing numbers.

- a. Is point D below nearer 2 or $2\frac{1}{2}$? _____
- b. Therefore, using this rule, the measure of CD is approximately _____ inches.

Assignment Sheet 9

b. Each inch on the rule below is divided into how many parts? _____

11. Fill in the missing numbers.
